

Features

- Available in configurations containing up to 8, 16, or 24 meters.
- MMU cabinets may contain E-Mon D-Mon® Class 1000 or Class 2000 (kWh or kWh/demand) meters.
- Compact installation of multiple meters allows for easy and centralized reading.
- IDRs (Interval Data Recorders) can be factory-installed along with the meters in the cabinet, allowing for easy interface to the E-Mon Energy™ software system.
- Three-phase MMU cabinets come with prewired voltage feeds. If IDR(s) are installed inside MMU cabinets, the connections from the meters to the IDR will also be prewired at the factory.

Model Numbers

When ordering, specify configuration, meters to be contained inside cabinet, and blank spaces (if any).

Example:

- 1 MMU16
- 11 208200M KIT
- 5 Blank Spaces

Available Configurations:

- MMU8
- MMU16
- MMU24

MMU Dimensions
